

English and maths

Horticulture: How Maths Makes Your Garden Grow?

Join us on this short maths course where you will learn about how plants grow and develop.

What are the entry requirements?

No formal qualifications are required to study this course. A willingness to learn is essential.

Need more information?

You can find out more about Northern College and the courses on offer by calling us on 01226 776000 or emailing us_courses@northern.ac.uk

Course description

It's science, but it's also a little bit of magic. Join us on this short maths course where you will learn about how plants grow and develop. You will learn about cloning plants and photosynthesis, as well as the kind of maths that nature presents us with. If you are interested in Horticulture and want to develop your maths skills at the same time, this is the course for you.

What you will learn:

- Biology of growing – germination, photosynthesis, feeding
- Cloning plants
- Growing herbs and vegetables
- Nature's numbers

What can this course lead to?

Functional Skills qualifications in English or Maths

Level 1 Award in Practical Horticulture Skills
